Introducing the Ritz Carlton Residences Miami Beach

BY KRISTIN TABLANG | FEBRUARY 13, 2015

Designed by master architect **Piero Lissoni** in partnership with Miami-based architectural firm ADD Inc., the **Ritz Carlton Residences Miami Beach**—sited on seven waterfront acres—will feature 111 condominiums and 15 single-family villas, half of which have already been sold.

Slated for completion in 2017, the ultra-luxe development promises supreme luxury living. Pre-wired for smart-home technology, the residences will tout stone flooring in all common spaces, as well as in the kitchen and bathrooms; sweeping hurricane-resistant windows and solid-core, oversized doors; and a laundry area equipped with a front-loading washer and dryer.

Custom-designed kitchens will come complete with designer Boffi cabinetry by Lissoni, along with stone countertops and state-of-the-art Gaggenau appliances (most of which are fully integrated).

While most homes will boast private elevator foyers, select residences will also feature summer kitchens and private plunge pools. Elegant baths will be outfitted with glass-enclosed, stand-alone rain showers and jetted soaking tubs, to boot.

Conveniently located just minutes away from a slew of sites such as the Bal Harbour Shops, South of Fifth, Fisher Island, and the Miami Design District, the posh residential will boast two 24-hour attended lobbies and valet service on top of scads of other amenities including an onsite private car and marina, a private day yacht, and a spa equipped with a treatment suite, steam rooms, and a sauna.

Additional offerings include a fitness center on top of indoor and outdoor yoga studios; a game room with virtual golf and billiards; a full bar; carwash facilities; and a dog-walking and pet grooming salon, not to mention a splendid rooftop infinity-edge pool accompanied by fully-serviced cabanas, a waterfall, and a meditation garden.
